

EduTracker Enterprise ERP: Full Institutional Operational Manual

This manual provides granular, step-by-step instructions for every business module within the EduTracker ecosystem. It is designed for Staff Training and Institutional Onboarding.

Table of Contents

1. Core Configuration & Branding
 2. Student Lifecycle Management
 3. The Financial Ecosystem (Revenue Management)
 4. Academic Examination & Result Engine
 5. The Question Paper Business (AI & Manual)
 6. Identity & Security Operations
 7. System Maintenance & Data Safeguard
-

1. Core Configuration & Branding

Goal: Establishing the school's digital identity.

1.1 School Profile

- **Action:** Go to **Settings > School Profile**.
- **Step:** Upload a high-resolution logo and enter exact contact details.
- **Business Logic:** This data is used as the header for every Voucher, Report Card, and Exam Paper. Ensure the **Academic Year** is correct to prevent data overlap.

1.2 Academic Groundwork

- **Action:** Go to **Settings > Academic Settings**.
 - **Step:** Add all Classes and Subjects.
 - **Step:** Define **Exam Types** and set their **Base Marks** (e.g., Final Exam = 100).
-

2. Student Lifecycle Management

Goal: Building the institutional database.

2.1 Registration

- **Action:** Go to **Students > Register Student**.
 - **Crucial Step:** In the **Identity** section, provide a **Profile Image URL**. This image is required for the automated ID Card and Report Card systems.
 - **Data Accuracy:** Ensure the **Roll Number** is unique per class.
-

3. The Financial Ecosystem (Revenue Management)

Goal: Eliminating revenue leakage and automating billing.

3.1 Fee Setup (The Price List)

- **Step 1:** Go to **Finance > Fee Setup > Fee Types**. Add categories like “Tuition Fee” (Monthly) or “Registration Fee” (One-time).
- **Step 2:** Go to **Class-wise Pricing**. Select a class (e.g., Grade 10) and set the exact amount for each Fee Type.

3.2 Monthly Billing (Voucher Generation)

- **Action:** Click **Generate Monthly Vouchers**.
- **Logic:** The system scans every student in the selected class and creates a digital debt based on your “Class-wise Pricing.”
- **Notification:** If enabled, parents will receive an immediate email with their total bill.

3.3 Payment Collection

- **Action:** Go to **Finance > Vouchers**. Find a student and click the green **Wallet icon**.
 - **Partial Payments:** If a parent pays half, enter the amount. The status changes to **PARTIAL**. The system will remember the remaining balance for the next visit.
 - **Receipts:** Click the **Eye icon** to print the dual-copy receipt. Page 1 (Office) and Page 2 (Student).
-

4. Academic Examination & Result Engine

Goal: Automated grading and professional reporting.

4.1 Grading Standards

- **Action:** Go to **Settings > Grade Scale**.

- **Logic:** Define percentage ranges (e.g., 90-100 = A+ / 4.0 GP). The system uses these rules to convert raw marks into grades automatically.

4.2 Marks Entry & Locking

- **Step:** Teachers go to **Marks**, select their Subject/Exam, and enter scores.
 - **Business Control:** Once finalized, marks can be **Locked**. This prevents unauthorized changes and sends a security alert to the Admin.
-

5. The Question Paper Business (AI & Manual)

Goal: Rapid, professional exam creation and templates.

5.1 The Question Bank

- **Action:** Go to **Question Bank**.
- **Step:** Populate your bank with questions categorized by Class, Subject, and Difficulty.
- **Logic:** This bank allows the school to build a “Knowledge Asset” that grows every year.

5.2 AI-Powered Generation

- **Action:** Go to **Question Papers > Create**.
- **Step:** Click **AI Generator**. Provide a Topic (e.g., “Algebraic Equations”) and the number of questions.
- **Business Value:** Reduces teacher workload from 4 hours to 4 minutes.

5.3 Professional Printing

- **Action:** Open a created paper and click **View/Print**.
 - **Step:** Choose a **Template** (Standard, Modern, or Classic).
 - **Step:** The system formats the paper into a perfectly aligned A4 document with instructions, marks distribution, and the school header.
-

6. Identity & Security Operations

Goal: Campus security and access control.

6.1 ID Card Studio

- **Action:** Go to **ID Cards**. Select a Class.
- **Step:** Click **Print All Cards**.

- **Output:** Generates vertical CR80 standard ID cards with **QR Codes**. The QR code links to the student's digital profile for security verification at the gate.

6.2 Role-Based Access (RBAC)

- **Action:** Admin goes to **User Management**.
- **Roles:**
 - **Accountant:** Access to Finance only.
 - **Teacher:** Access to Academics and Attendance only.
 - **Principal:** Access to Reports and Students (View Only).
- **Logic:** Protects sensitive financial data from being seen or modified by teachers.

7. System Maintenance & Data Safeguard

Goal: Institutional data permanence.

7.1 Automated Backups

- **Action:** Go to **Settings > Database & Backup**.
- **Manual Dump:** Click **Backup Now** to get an immediate SQL file of your school data.
- **Auto-Schedule:** The system runs a full backup every night at **2:00 AM**.

7.2 Audit Logs

- **Action:** Go to **Audit Logs**.
- **Usage:** Use this during disputes (e.g., if a mark was changed). It shows exactly which staff member made the change and at what time.
